

Parental support and involvement will help your student to be a successful musician, especially at this beginning stage! Please watch these basic band videos together with your student. Have your student assemble the instrument, learn hand position, and play a beginning sound on the instrument along with the video. Help your student to assemble carefully, and check for correct hand position and mouth formation as best as you can. Take your time to try these videos over the course of this week and next; videos can be watched multiple times to reinforce correct technique.
